SMART OHC SOFTWARE

**YOUR
HEALTH
IS OUR
PRIORITY**

A mini-guide on:
How to use the OHC software by Healthledger Diagnostics?

What is Smart OHC?

This software is a platform that assists the nurses to book doctor's appointments, and keep a medical record of your employees.

- Complete Patient Profile from Healthledger's smart OHC software modernizes the whole process to upload your employees medical reports, prescriptions, etc.

- Digitize Patient Records that send electronic prescriptions to your employees from anywhere and store patient data digitally.

- Manage Diagnostic Reports from the OHC Smart Software facilitates quick access to diagnostic reports to the right parties
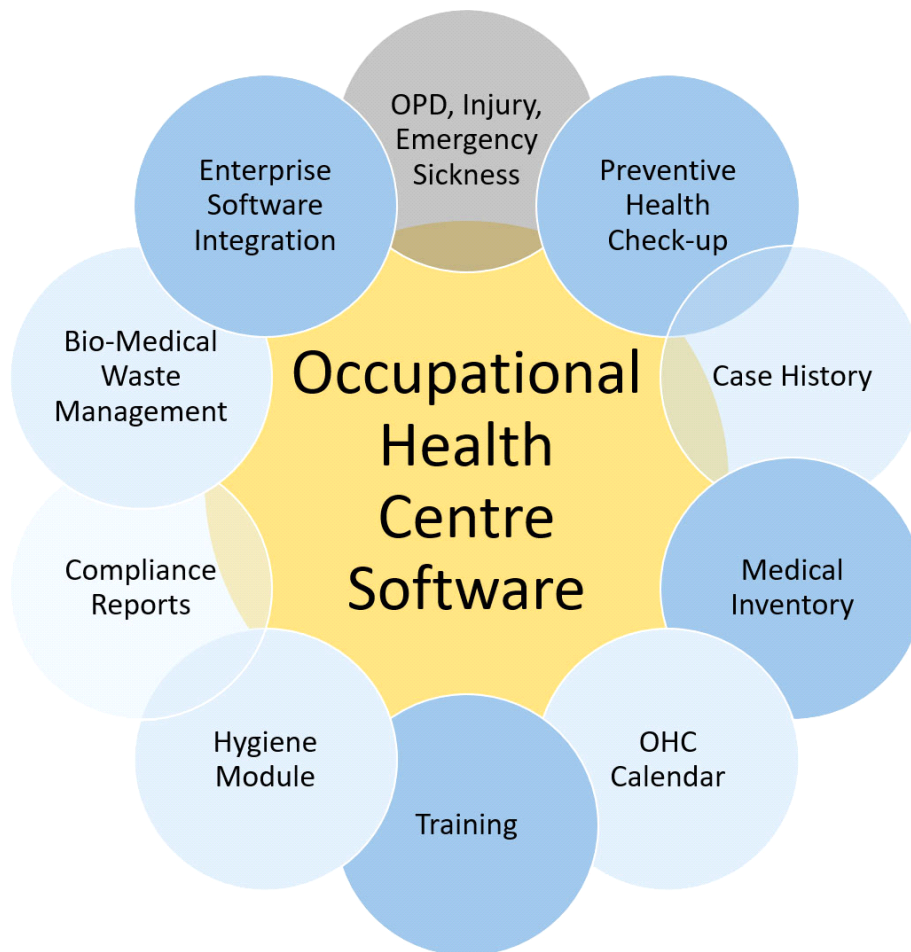

Need of OHC?

1.

HL Smart OHC software is used to monitor the health and safety of employees and handle work-related incidents that may have set employees at risk.

2.

Organizations use this type of software to establish rules and best methods that all employees must follow to avoid incidents.

Benefits of OHC

- Improved health and safety performance.

- Reduced cost associated with accidents and incidents.

- Improved staff relations and morale

- Improve business efficiency.

People who will benefit from the OHC Software

There are multiple benefits for people using the OHC software:

Lesser Workload

The workload on the employees will be a lot lesser in terms of submitting documents and streamlining services

Well Organised Record

The employers have well-organised records for ease of access

Easier Medical Inventory Track

It is easier for HR to keep track of inventory of the medical supplies that might be needed

Easier Emergency Access

It is easier to access emergency services like ambulances, and first aid services

The OHC Software User Guide
